

BUSINESS INTELLIGENCE CONSULTANT (M/F/D)

FULL TIME

SLOVAKIA - Bratislava GERMANY

01

JOB DESCRIPTION

Who you are

You are a person with problem solving skills, with more than 2 years of experience in working with BI analytical tools and you are motivated to extend your expertise in the BI consulting area.

- You have analytical thinking aptitude with a problem-solving attitude
- You have worked with analytics tool like Power BI or other MS dashboarding product family: Tableau, SAP Business Objects Design Studio, Web Intelligence, etc.
- You are skilled in JavaScript and CSS (at least 2 years of experience)
- You have experience with creating SQL queries
- You are fluent in English

Nice to have

- Experience with SAP Bex queries or with SAP HANA Views is beneficial
- Fluency in German or Spanish would be an asset as well

What you will do

In the role of the Business Intelligence Consultant, you will provide expertise in design, configuration, development and implementation of Business Intelligence and analytics systems. You will also analyze business requirements and map them according to SAP best practice business processes. The projects you will work on will cover topics such as:

- Conduct business analysis to understand customer requirements
- Translate business needs into technical specifications for the report design as well as specifications for the developer if development is required
- Design, build and deploy BI reports in the SAP universe (mainly in SAP Design Studio, SAP BO WEBI)
- Learn and adopt latest technologies in your solutions
- Create or adjust operation data models
- Develop ETL
- Support development for business consultants, by providing advisement on data model, as well as develop scripts required for business analytics

When working on projects, you will be conducting business meetings with customers to determine project requirements and milestones. You will work in a team of professionals whose main objective is to support the customer. As we foster open communication culture, every team member is encouraged to openly discuss any project challenges and contribute to their solutions.

Your team

“Get to work on extremely challenging projects for the biggest companies in the world in a group of clever and young people”

Oliver Vontszemu

Senior Manager BI Services

What we offer

- Working with technical experts and consultants worldwide
- Innovative and dynamic international environment
- Exciting challenges and personal development opportunities

02

BENEFITS & APPLICATION

Benefits

- Possibility to travel abroad
