

Bitesize BW Migration to any HANA

The simple and effective way to equip your BW for the future

As one migration ends the next one is looming just around the corner

Perhaps you are planning to upgrade to SAP BW 7.5 from an outdated BW version or you even want to go the whole hog and migrate to BW/4HANA. Perhaps you are already on BW 7.5 and now want to take the final step to BW/4HANA. Either way, each of these initial situations is not easy and so sometimes you do not know where to start.

Many customers ask themselves when they should act and how. Migrations are always timely and cost intensive and unforeseeable difficulties arise in projects again and again.

3 scenarios - a brief overview

1. Upgrade to BW 7.5 on HANA
2. Migration from an older BW via BW 7.5 on HANA to BW/4 HANA
3. Migration from BW 7.5 on HANA to BW/4 HANA

Precise planning, step-by-step projects and keeping an eye on day-to-day business

Whether the decision has already been made or you are still at the beginning of your planning, daily business and the efficient use of what you already have are a priority. Performance of your BW is relevant for your business and should therefore come first.

Together we develop fields of action and ensure that your BW, your HANA performance, and your data are on top form. This way you are optimally positioned for daily business and prepared for upcoming migrations. We divide the upcoming steps into project packages. Fixed prices and fixed timelines give you planning and cost security. We make this possible through the precise use of tools and many years of expertise of our consultants. And you decide: Step by step or an entire project.

Datavard BitesizeBW packages:

- Stack Split
- All Pre-Checks
- Datavard Readiness Check
- Conversion of 3.x objects to 7.x
- Conversion of HANA objects
- Datavard ABAP Code Scan
- Data Offloading
- Frontend Solutions: Analysis, Migration, Implementation

Key Benefits

- Detailed as-is analysis
- Joint development of priorities
- Concrete recommendations for action
- Step-by-step approach, tailored to your needs
- Modular principle
- Can be planned & implemented
- Clearly defined outcome per module
